

ALEXANDRA PADILLA

Washington, DC · oneadp@gmail.com · (707) 548-5954 · [linkedin.com/in/alexandra-ag](https://www.linkedin.com/in/alexandra-ag)

Self-taught Salesforce builder who designs, builds, and maintains a full production org, working autonomously and collaboratively across Finance, Business Development, Marketing, and Policy to translate business requirements into scalable Apex, Flow, and integration solutions. Salesforce Certified Advanced Administrator and sole administrator, developer, and support resource for Salesforce and all connected business systems at 30-person organization. Builds to what end users actually need: drove 80% Salesforce adoption in first year. Currently running Claude in Salesforce sandbox while leading organization-wide rollout. Passionate about art, music, adventuring and innovation. Seeking an opportunity to solve hard problems and make a positive impact.

EXPERIENCE

California Life Sciences Washington, DC

Director, Business Systems & Analytics June 2024 – Present

- Integrated Claude with Salesforce sandbox; leading organization-wide rollout, defining how AI-assisted development and enablement work in practice.
- Built Lightning Web Component surfacing duplicate lead and contact matches at record load, bypassing default functionality of users hitting duplicates only at end of native conversion flow.
- Built Salesforce–QuickBooks integration via Postman, moving all invoicing into Salesforce with automated handoff; eliminated duplicate data entry across both systems and cut Finance team’s manual workload.
- Shipped production REST API integration pulling member PAC contributions to legislators from FEC data into Salesforce; built Policy & Advocacy metrics dashboard on top of it.
- Developed REST API integrations with OpenStates and Google APIs automating federal and state legislative district assignment, replacing \$17K/year vendor with no-cost, auto-updating open-source alternative.
- Built Apex trigger-driven integration publishing active members to public WordPress member directory, keeping external-facing web property in sync with membership status.
- Designed Salesforce solutions using Apex, Flow, and custom objects across Finance, Business Development, and Marketing; built integrations with ZoomInfo, Conga Composer, Nintex DocGen, and FormAssembly.
- Implemented lead scoring model on demographic fit and engagement behavior, enabling BD team to prioritize membership prospects; led CRM cleanup exceeding 90% removal target for outdated and duplicate records.
- Built end-to-end sponsorship pipeline from proposal through invoice generation, with real-time inventory, assignment, and conversion tracking; eliminated manual handoffs between two teams.

Salesforce Administrator / Developer March 2022 – May 2024

- Implemented real-time revenue recognition using custom objects and Apex triggers, delivering multi-year backlog item treated as too complex to build.
- Drove 80% Salesforce adoption within first year, moving major departments off spreadsheets and into single system of record.
- Integrated Salesforce with HubSpot, Eventbrite, Zoom, and web forms for end-to-end marketing-to-sales attribution and lead pipeline tracking.
- Implemented CRM security architecture: MFA and SSO enforcement, department-level profiles and sharing, session hardening, full instance backup strategy.

Fathom Oakland, CA

Business Systems Analyst – Commercial | Business Systems Administrator May 2019 – March 2022

- Managed Salesforce CRM and commercial business systems through Fathom’s acquisition and IPO, maintaining platform reliability during significant organizational change.
- Managed enterprise integrations including Infor CloudSuite Industrial, Pardot, PaperlessParts, and Salesforce Maps using REST/SOAP APIs and Jitterbit middleware.
- Led requirements gathering and technical design sessions; built UAT frameworks, SOPs, and release documentation supporting repeatable deployments.
- Implemented and managed sales territory mapping model; designed custom formula fields, validation rules, workflow rules, and approval processes.

- Supported UAT, user training, and rollout of platform enhancements across commercial teams.

Production Support Engineer August 2016 – May 2019

- Built preventative maintenance tracking system and SOPs in Salesforce — first Salesforce build — to enforce compliance across multiple production teams.
- Helped launch Service Cloud at Seattle site; trained employees across both sites on maintenance tracking and supported the team remotely on case management.
- Maintained, calibrated, and repaired 18 Stratasys PolyJet and FDM 3D printers; installed new platforms including Nano Dimensions PCB, HP Multi Jet Fusion, and 3D Systems SLA.
- Served as sole Northern US subject matter expert on Nano Dimensions printer; hosted client tours and represented the platform at CES.

Earlier:

- Studio Technician, Nikolas Weinstein Studios
- Composites Fabricator, Makani at Google
- Artistic Fabricator, Performance Structures Inc.

TECHNICAL SKILLS

Salesforce Development Apex (triggers, classes, automation), Lightning Web Components, SOQL, SQL, Flow Builder, custom objects, validation rules, approval processes, Lightning Experience

Integrations & APIs REST APIs (FEC, OpenStates, Google), QuickBooks, WordPress member directory, REST/SOAP callouts, Postman, Jitterbit middleware, HubSpot, Eventbrite, ZoomInfo, Conga Composer, Nintex DocGen, FormAssembly

Tooling & AI-Assisted Development VS Code, GitHub source control, sandbox-to-production deployment; Claude — Salesforce sandbox integration, org-wide rollout, build and review workflow

Platform & Governance Security architecture (MFA, SSO, profiles, sharing and visibility), data governance and validation standards, executive KPI dashboards and reporting

CERTIFICATIONS & EDUCATION

Salesforce Certified Administrator · Salesforce Certified Advanced Administrator

Superbadges: Process Automation Specialist, Lightning Experience Rollout Specialist, Security Specialist

Sonoma State University — Bachelor of Arts, Studio Art
